HIGH SCHOOL ADDITION PROVES WISDOM OF FORESIGHT

West and North Elevations of New Wing at Torrance High School

The new addition to the Torrance High School conforming to the other buildings of the group proves the wisdom of building originally with an eye to future expansion. The wing on which work will start soon will extend west from the main building about parallel to Carson street. It will house the Home Economics and Science departments and will be equipped with a wealth of modern apparatus for cooking and sewing classes and for the various branches of science including physics, chemistry and biology. The structure itself will in design match the main building to which it will be joined by a col-

onnaded araway similar to that which links the auditorium to the main building. The new building will relieve congestion in the main structure and provide space for future growth. In addition to the setpiece wing there will also be constructed a spacious cafeteria under the auditorium. This cafeteria will occupy the entire space under the "aud". Entrance will be possible from each side from araways. There will be two service lines in the main dining room and a separate one for members of the faculty, who will

also have a separate dining room. Part of the excavation under the auditorium has already been made at the western end where dressing rooms for boys' and girls' gymnasium classes were located prior to the erection of the new gymnasium. With the completion of the new science wing and the opening of the large cafeteria the plant at Torrance High school will be among the most complete and modern in the Southland, though it will still be capable of even more expansion to meet the needs of the growing city of Torrance.
